## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsutomu (JP 2001-348515). The machine translation of this document is used for the citation purposes.
3. Regarding claim 1; Tsutomu teaches a coating composition which comprises a siloxane compound of the general formula (1):

Wherein  $\text{R}^1$ ,  $\text{R}^2$ ,  $\text{R}^3$ , and  $\text{R}^4$  are the same or different, represented by an alkyl group having 1 to 4 carbons, and  $n$  indicates an integer from 1 to 50 and a cationic initiator [0008-0009].

4. Regarding claim 2; Tsutomu teaches the composition further comprises a cationic polymerizable compound; which is a molecule having a cationically polymerizable functional group, which include, epoxy compounds [0012].

5. Regarding claim 3; Tsutomu teaches the coating composition further comprising a free radical polymerizable compound to be in certain instances, a vinyl compound having double bond functionality. Specific examples of the free radical polymerizable compound as disclosed by Tsutomu are diethylene methacrylate, triethylene glycol dimethacrylate, propylene glycol dimethacrylate, and polyethylene glycol dimethacrylate [0041].
6. Regarding claim 4; Tsutomu discloses a coating composition which is curable by active energy rays comprising a free radical polymerization initiator [0009], an epoxy compound [0012], and a vinyl compound [0041] .
7. Regarding claim 5; Tsutomu discloses a film formation method by applying the coating composition as set forth in paragraph 3, to a substrate, irradiating with active energy, and obtaining a cured film [0009].
